EJ'S SOLUTIONS

ENVIRONMENTAL POLICY-

Date Issued:	20th April 2018	Policy No . SP002
Revised Date:	-	
Department:	ENVIRONMENTAL POLICY	

Environmental Policy ^(SP 002)

EJ's Solutions Ltd is an environmentally aware Company and we expect our employees and clients to contribute where possible to protect the environment.

This can be achieved by following the simple rules shown below:

- Return any unused items from site to the stores.
- Redundant fluorescent tubes and toner cartridges are to be returned to store for disposal.
- Turn lights, Air Conditions, heaters and monitors off at night.
- Ensure waste is separated and disposed of in designated skips.
- When printings do not waste paper, try to use both sides.

EJ's Solutions Ltd acknowledges the Environmental Management Act 2004 on the objective to provide for legal and institutional framework for sustainable management of environment. Moreover to outline principles for management, impact and risk assessments, prevention and control of pollution, waste management, environmental quality standards, public participation, compliance and enforcement; to provide a basis for implementation of international instruments of environment and its associated legislation. All hazardous substances will be disposed of in the correct manner according to the manufacturer's details, (COSHH Sheets).

All site waste shall be disposed of in bins provided by the client or returned to the workshop/retailer for disposal.

In accordance with current guidance from the Environmental Agency MGS Logistics Ltd will adopt the following nine principles:

Storage and Handling of materials

We will supervise deliveries of materials to our client sites and check the delivery note to ensure that the goods ordered are those received. Clearly label refillable containers with contents and storage capacity; this will reduce the risk of overfill and spillage will ensure that the contents are easily identified.

Noise and odour

We will act on any incident reported to the local authority Environmental Health department will deal with any complaints of "statutory nuisance" such as:-

1. Poor state of your premises
2. Noise
3. Smoke, fumes, gases dust or steam
4. Smell
5. Effluents
6. Keeping of animals
7. Accumulation of refuse or other material.

The Local Authority Environment Health department has the power to impose restrictions or to close down business if they find just cause, we expect our clients to take all reasonable steps to prevent or minimise a nuisance or potential nuisance, in the same manner and professionalism as we do. For example, establish whether you might be causing nuisance to neighbours by regularly checking noise, odours and emissions near the boundary of your premises at different times of the day and during different operating conditions.

Discharge of water

We will ensure that any wastewater, oils and concentrated chemicals that require special attention or treatment are disposed of in the correct manner after taking advice and guidance from suppliers, the local authority or the Environmental Agency. We will do this as our “Duty of Care” and dispose of the material at the correct and authorised sites. We expect our clients to follow our lead in this initiative.

Storage and disposal of waste

Whatever the method of disposal of waste, and type of waste, we at EJ’s Solutions Ltd have a “Duty of Care” to ensure the safe and correct disposal or recovery of the waste produced by our clients and ourselves. Our clients have the same duty of care and we expect them to adhere to our policy. We will endeavour to record all waste received or transferred through a system of signed waste transfer notes. Everyone is responsible for this waste whether it is passed onto another party such as:-

1. Specialist contractor
2. Scrap metal contractor
3. Recycling contractor
4. Local Authority

The “Duty of Care” has no time limit and extends until the waste has either been fairly and properly disposed of or fully recovered.

Packaging

We will endeavour as far as possible to use reusable packaging wherever possible. We will work with our suppliers to reduce the quantity of packaging waste that needs to be disposed of and use our buying power to discriminate against over-packaged items.

Land contamination

We will work together with any local authority to check any contracted land for contamination. If remedial work is required, we will liaise with the relevant authorities to do this in the best way possible to the benefit of the public, our client and the environment. We will do this within an agreed time limit mutually agreed with the relevant authorities.

Energy efficiency

We encourage all our staff to be environmentally conscious. We expect them to save energy by being proactive in turning lights off, monitoring utility consumption and wherever possible switch off non-essential appliances, especially overnight. This will include personal computers, heating systems, charging items printers etc. Employees are expected to monitor unused electrical items and switch off where possible.

Water efficiency

Water efficiency is constantly monitored by use of meters, bills and a proactive approach to general use.

Legislation

We will endeavour to keep abreast of new legislation, regulators guidance and authority's communications to achieve all of the above goals to preserve the environment.
